EDUCATION

B.Tech in Computer Science *Expected 2028*
VIT Bhopal University *Bhopal, Madhya Pradesh*

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, C++, SQL, HTML, CSS
Frontend:	React.js, Next.js (App Router), Vite, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, WebSockets, Socket.IO, WebRTC, OAuth, Role-Based Access Control
Databases:	PostgreSQL (Row-Level Security), MongoDB, MySQL, Supabase
AI/ML:	Machine Learning, TensorFlow/Keras, NumPy, Pandas
Tools:	Git, GitHub, Docker, Vercel (CI/CD), Vitest, Ethers.js
Core Concepts:	Data Structures and Algorithms, Problem Solving, Full-Stack Development (MERN), REST API Design, Code Review, Agile

PROJECTS

VIT Bhopal Sports Facilities – Full-Stack Booking & Access System *Live at VIT Bhopal* | GitHub
Next.js (App Router), TypeScript, Hono, Supabase (PostgreSQL, RLS), Tailwind CSS, Vitest, PGlite

- Deployed to **production** at VIT Bhopal with **1,000 weekly active users**, architected to scale to the full **10,000-student** campus.
- Engineered **conflict-free slot booking** for **1,000+ students** across pickleball, tennis and turf facilities, guaranteeing **zero double bookings** by enforcing slot uniqueness through **PostgreSQL constraints**.
- Secured access for three roles (students, guards and admins) with **Row-Level Security** policies on Supabase PostgreSQL, behind **Google OAuth/OTP** restricted to `@vitbhopal.ac.in` accounts.
- Automated the booking lifecycle with **guard-verified QR check-in**, **waitlist promotion** on cancellations and **no-show tracking**.
- Shipped an **admin dashboard** (maintenance block-outs, incident photo reports, feedback triage and usage analytics) and validated constraints and RLS with **Vitest** tests on in-memory **PGlite**, in an npm workspace monorepo.

MeriYatra – Real-Time Public Transit Tracking Platform github.com/shahabhilash/MeriYatra
React.js, Vite, Tailwind CSS, Supabase Realtime, PostgreSQL, React-Leaflet, OSRM

- Architected a **live tracking platform** that connects daily commuters with local transit such as autos, cabs and private buses.
- Streamed vehicle positions over **WebSockets** in **under 100 ms** and refreshed ETAs through an **OSRM routing engine** on every GPS update.
- Delivered driver and passenger **dashboards** with ride scheduling, route search, authentication and a bilingual (English/Hindi) interface.
- Packaged the product as a **Chrome Extension** and deployed it on **Vercel**.

Meetly – Real-Time Video Conferencing App github.com/shahabhilash/meetly
React.js, Node.js, Express.js, Socket.IO, WebRTC, MongoDB

- Implemented **peer-to-peer video calls** using **WebRTC**, with a **Socket.IO** signaling server that supports multi-user meeting rooms.
- Built the **REST API** backend (Node.js, Express.js, MongoDB) and a responsive, event-driven **React.js** frontend.

EXPERIENCE

Open Source Contributor (Top 100), GirlScript Summer of Code (GSSoC) *2026*

- Ranked in the **Top 100** contributors of GSSoC 2026 by merging **150+ pull requests** (features, bug fixes and documentation) across multiple **open-source repositories**.
- Incorporated maintainer feedback through **Git-based code review**, iterating on pull requests until they met each project's standards and were merged.

Technical Team Member, 5 College Clubs, VIT Bhopal

- Served on the **technical teams of 5 college clubs**, demonstrating strong **collaboration** and **execution** across multiple concurrent projects.
- Organized and executed **large-scale college events** with **1,000+ participants**, ensuring smooth **technical operations** and coordination.

ACHIEVEMENTS

- **Winner (Rank 1)** in a **debugging competition**, finishing first by diagnosing and fixing faulty code faster than every other contestant.

CERTIFICATIONS

- **Oracle Cloud AI Foundations Associate**, Oracle (Oct 2025)
- **Prompt Engineering**, Infosys Springboard
- **Full Stack Web Development**, Apna College
- **Data Analytics Job Simulation**, Deloitte Australia (Oct 2025)
- **Introduction to Internet of Things**, NPTEL (Oct 2025)
